Career Objective

Analytical and detail-oriented B.Tech Biotechnology graduate transitioning into IT and data-focused roles. Possess foundational knowledge in Python, SQL, and data analysis, along with experience handling and interpreting biological and research data through academic projects and bioinformatics training. Skilled in problem-solving, documentation, and analytical thinking, with an interest in applying technical and data-driven approaches in professional environments.

Core Skills

- **Programming:** Python, SQL, C programming
 - **Bioinformatics & Computational Tools:** PyMol, PyRx, BLAST, UniProt, CADD Tools
 - **Scientific & Technical Skills:** Microbial Culturing, Bioremediation Assays, Microbiological Analysis
 - **Soft Skills:** Communication, Problem Solving, Scientific Writing, Teamwork
-

Education

B.Tech(Honours) in Biotechnology

Bannari Amman Institute of Technology, 2021 – 2025

CGPA: 8.71

Higher Secondary (HSC) – 94.84%

RKR Gnanodhaya MHSS, 2020 – 2021

SSLC – 95.00%

RKR Gnanodhaya MHSS, 2018 – 2019

Projects & Research

Synthesis of Zinc-containing Whitlockites (2025)

- Developed a lab-based synthesis process for Whitlockites, targeting bone tissue engineering applications.
- Focused on enhancing biocompatibility and osteogenic potential.

Hydrocarbon-Degrading Microbes for Bioremediation (2024)

- Isolated and characterized microbes from contaminated soil and water.
 - Designed optimized media to enhance enzymatic degradation.
 - Conducted biochemical assays to determine degradation efficiency.
-

Internships & Training

NyberMan Bioinformatics, Europe (July 2024)

- Practical training in Computer-Aided Drug Design (CADD). - Experience in data retrieval, molecular docking, and protein-ligand interaction studies using PyMol.

Dynamics Megaceutics, Chennai (Oct 2022)

- Worked on Spirulina production and zebrafish toxicology. - Learned zebrafish maintenance, breeding, and dissection techniques.
-

Publications

- *Recent Approaches and Trends in Bio-flocculants for Environmental Sustainability: An Apodictic Review.* [DOI: <https://doi.org/10.33263/BRIAC151.010>] Biointerface Research Journal, February 2025
 - Isolation and characterization of hydrocarbon-degrading enzyme and their potential application in bioremediation. [DOI: <http://dx.doi.org/10.51470/BCA.2026.26.1.755>] Biochemical And Cellular Archives, April 2026
-

Certifications

- The Complete SQL Bootcamp: Go from Zero to Hero – Udemy (2025)
 - Data Analysis for Biologists – NPTEL (2024)
 - Forests and their Management – NPTEL (2024)
 - Wildlife Ecology – NPTEL (2023)
 - Functional Genomics – NPTEL (2022)
-

Achievements & Recognition

- Selected for Smart India Hackathon Grand Finale – 2023
 - Filed two patents in hydrocarbon bioremediation and herbal formulation (2023, 2024)
-
